

## Appendix I

# Pittsford Schools

### Bloodborne Pathogens Training

Training included the following elements:

- The OSHA standard for Bloodborne Pathogens.
- Epidemiology and symptomatology of bloodborne diseases.
- Modes of transmission of Bloodborne Pathogens.
- This Exposure Control Plan, i.e. points of the plan, lines of responsibility, how the plan will be implemented, etc. and how to obtain a copy.
- Procedures which might cause exposure to blood or other potentially infectious materials.
- Control methods used in the work area to control exposure to blood or other potentially infectious materials and their limitations.
- Personal protective equipment available, proper use of equipment, how to select appropriate equipment and who should be contacted.
- Post Exposure evaluation and follow-up.
- Signs and labels used.
- Hepatitis B vaccine program.
- An opportunity to ask questions.
