

Math Problem Solving Plan

1. Understand

- Read the problem carefully.
- What do I need to find out?
- If there are charts or drawings, study them.
- What do I know?

2. Plan

- Which strategy am I going to use?

3. Try It

- Go ahead with the strategy you picked.
- Work carefully.

4. Look Back

- Reread the question.
- Did you answer the question that was asked?
- Does your answer make sense?
