

New York's Tax Levy "Cap" Formula:

How does it add up?

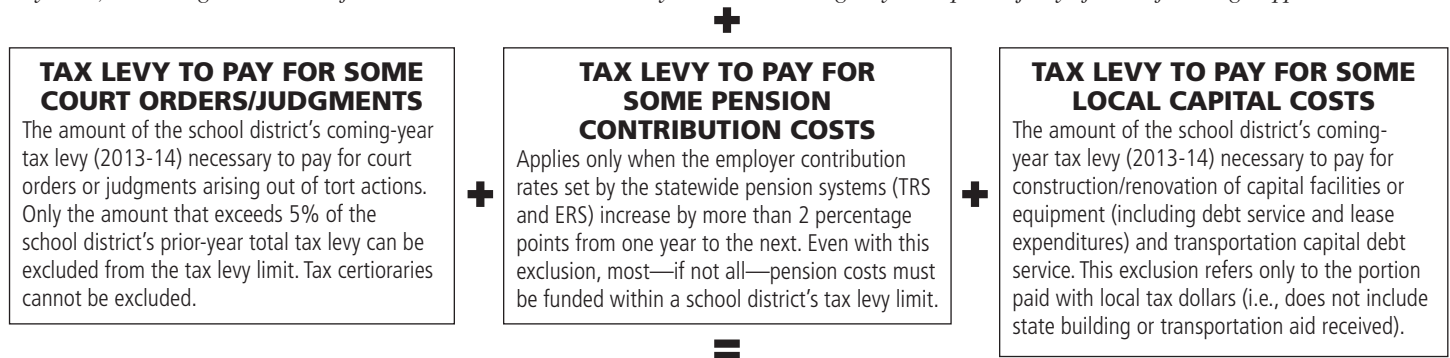

Although often referred to as a "2 percent tax cap," New York's tax levy "cap" law does not restrict any proposed tax levy increase to 2 percent. Pursuant to the law, each school district must follow an 8-step calculation, outlined below, to calculate its individual "tax levy limit." That limit then determines what level of voter support is required for budget approval.

THE BASE FORMULA

EXCLUSIONS TO BE ADDED

The law excludes certain portions of a school district's tax levy from the calculation above. A district can add these exclusions (described below) to its tax levy limit, increasing the amount of taxes the district is allowed to levy while still needing only a simple majority of voters for budget approval.

MAXIMUM ALLOWABLE TAX LEVY

The tax levy limit plus exclusions. This is the highest total tax levy that a school district can propose as part of its annual budget for which only the approval of a simple majority of voters (50% + 1) is required.
