# **CLOSING THE BOOKS:**

At the end of the accounting period, the company makes the accounts ready for the next period.

formally recognize, in the general ledger, the transfer of

- net income (or net loss) and
- owner's drawing to owner's capital.

Only at the end of the annual accounting period.

### There are FOUR closing entries

- 1. Revenue is closed into the Income Summary
- 2. Expenses is closed into the Income Summary
- 3. The Income Summary balance is closed to the capital account
- 4. The Drawings account is closed to the capital account.

Journalize the closing entries from the financial statement columns of the worksheet.

	Service revenue Income summary	3,170	3,170

<del>Posted</del>	Income summary  I. Spy, Capital	760	760
	I. Spy, Capital I. Spy, Drawing	600	600

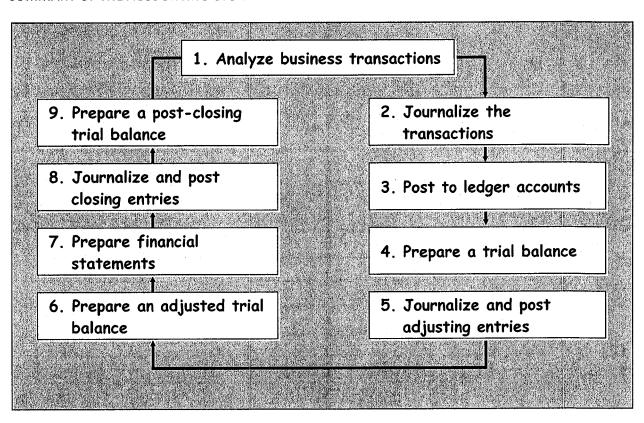

# **Preparing a Post-Closing Trial Balance:**

After we close our accounts we must prepare a post-closing Trial Balance

The Purpose is to prove the equality of the permanent account balances after journalizing and posting of \_\_\_\_\_\_ entries. (Note: All temporary accounts will have a ZERO balance)

		Closing Balance

Cash	\$ 2,500

Accumulated Depreciation		\$ 1,400

#### **SUMMARY OF THE ACCOUNTING CYCLE:**

To the users of financ	ial statements, <u>adequate</u> <u>disclosure</u> is perhaps the most important
accounting principle.	This principle simply means that financial statements should be
accompanied by any	necessary for the statements to be interpreted
properly.	

# What Types of Information Must Be Disclosed?

Two items always disclosed in the notes to financial statements are the accounting **methods** in use, (calculation of depreciation) and **due** dates of major liabilities.

# Ex: Note 1: Depreciation policies

Depreciation expense in the financial statements is computed by the straight-line method. Estimated useful lives are 20 years for the building and 5 years for tools and equipment.

Other information that should be disclosed include:

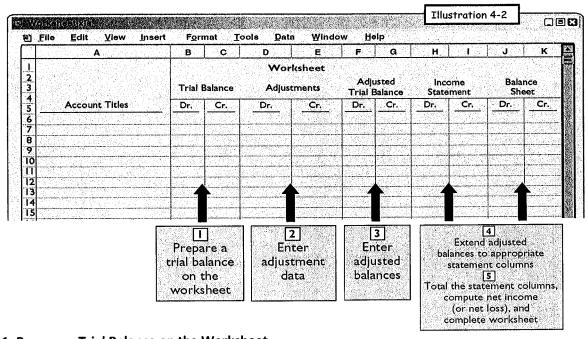

- •
- •
- Significant Events occurring after Balance sheet date but before Financial Statements are issued.

#### **Using a Worksheet**

A worksheet is:

- Not a permanent accounting record.
- step process.
- Use of worksheet is \_\_\_\_\_\_. (This is a tool to help make financial stmts it is NOT a stmt)

What a Worksheet looks like & the 4 steps:

# 1. Prepare a Trial Balance on the Worksheet

- Include accounts with balances.
- Trial balance amounts come directly from \_\_\_\_\_\_ accounts.

# 2. Enter the Adjustments in the Adjustments Columns

- Add additional accounts as needed.
- Enter adjustment amounts, total adjustments columns, and check for equality.
- each adjusting entry

#### 3. Complete the Adjusted Trial Balance Columns

Total the adjusted trial balance columns and check for \_\_\_\_\_\_.

#### 4. Extend Amounts to Financial Statement Columns

- Extend all \_\_\_\_\_ and \_\_\_\_ account balances to the income statement columns.
- Extend all asset, liability, and equity account balances to the \_\_\_\_\_\_ sheet columns.

# 5. Total Columns, Compute Net Income (Loss)

Compute Net \_\_\_\_\_ or Net \_\_\_\_\_.
