ACCOUNTING

Evaluating Profitability & Solvency

At the end of the fiscal year, Overnight Auto Service considers: the financial results of its first year of operation:

- Impressive service revenue of \$172,000
- A promising contract with Harbor Cab to rent storage space for its cabs. (Signed contract on Dec. 1—Harbor Cab paid for the first three months in advance.)
- In addition if Harbor Cab stores its pairs.

becomes the likely cand	idate to perform any necessary maintenance & rep

Chapter 6: Merchandising Companies

Merchandising Companies

Comparing Merchandising Activities with Manufacturing Activities:					
Merchandising companies	VS.	Manufacturing companies			
		9 -			

Selling merchandise introduces a new and major cost of doing business--the cost to the merchandising company of the goods that it resells to its customers. This cost is termed the cost of goods sold. In essence, the cost of goods sold is an expense; however, this item is of such importance to a merchandising company that it is shown separately from other expenses in the income statement.

Condensed income statement for a merchandising company:

COMPUTER CITY Condensed Income Statement For Year Ended December 31, 2010

Revenue from sales	\$900,000
Less: Cost of goods sold	540,000
Gross Profit	. \$360,000
Less: Expenses	. 270,000
NET INCOME	\$ 90,000

Operating Cycle of a Merchandising Company

The series of transactions through which a business generates	its revenue and its cash
receipts from customers is called the	. The operating
cycle of a merchandising company consists of the following b	asics transactions:

- (1)
- (2)
- (3)

As the word *cycle* suggests, this sequence of transactions repeats continuously. Some of the cash collected from the customers is used to purchase more merchandise, and the cycle begins again.

Accounting System Requirements for Merchandising Companies

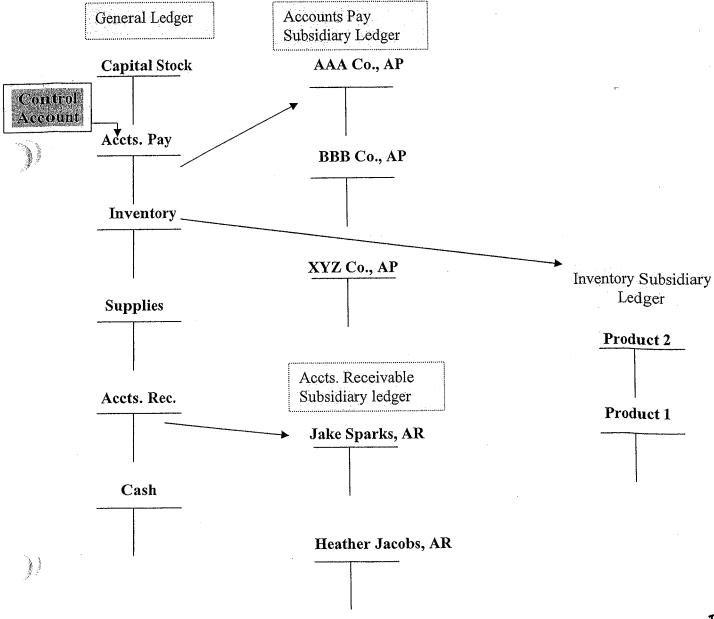

Although general ledger accounts such as AR & AP provide a useful overview of a company's financial activities, they do not provide much of the detailed information needed in the daily business operations.

This detailed information is found in an accounting record called a

A subsidiary ledger contains a separate
for each of the items included in the balance of a general ledger account.

*A general ledger account that summarizes the content of a subsidiary ledger is called a account. Examples are: AR, AP and Inventory

General ledger accounts supported by a subsidiary ledger:

0	Perpetual inventory system—The inventory account is continuously to reflect items on hand. Purchases of merchandise are
**************************************	recorded by debiting an asset account entitledat cost.
0	Periodic inventory system—no effort is made to keep up-to-date records of either inventory or the of sold. Instead, these amounts are determined only periodically—usually at the end of the year. The foundation of the periodic inventory system is the taking of a complete physical inventory at year-end.
0	Today, most businesses use computers to assist in maintaining <i>perpetual</i> systems. Therefore, we will focus only on the perpetual inventory system .

Closing Entries in a Perpetual Inventory System

As you know, *revenue* and *expense* accounts are **closed** at the end of each accounting period. A merchandising business with a perpetual inventory system makes closing entries that parallel those of a service-type business. What are some of the accounts of a merchandising business that would be closed?

Transactions Relating to Purchases—Credit Terms & Discounts

In addition to the basic transactions illustrated and explained in this chapter, merchandising companies must account for a variety of additional transactions. Examples include *discounts* offered for prompt payment, *merchandise returns*, and *transportation* costs.

Credit Terms and Cash Discounts

One common example of a credit term is "net 30 days," or "n/30" meaning full payment is due in 30 days. Manufacturers and wholesalers usually allow their customers 30 or 60 days in which to pay for credit purchases. Frequently, however, sellers offer their customers a small discount to encourage earlier payment.

Perhaps the most common credit term offered by manufacturers and wholesalers are 2/10, n/30. (Two ten, net thirty) This means that full payment is due in 30 days, but that the buyer may take a 2% discount if payment is made within 10 days.

Recording Purchases at Net Cost

Most well-managed companies have a policy of taking advantage of *all* cash discounts available on purchases of merchandise. These companies initially record purchases of merchandise at NET COST—that is, the invoice prices minus any available discount.

Examples of net cost transactions:

On July 6 Play Clothes purchased \$4,000 of merchandise on credit with terms of 2/10 n/30 from Kid's Clothes.. What account is debited? Credited?

GENERAL JOURNAL			

On July 15 (within discount period), Play Clothes pays the full amount due to Kid's Clothes. What account is debited? Credited?

Transportation Costs on Purchases:

Transportation costs related to the acquisition of assets are part of the cost of the
asset being acquired. Debit Inventory for the transportation costs and credit the
payment (Cash or AP)

Transactions Relating to Sales

Credit terms and merchandise returns also affect the amount of sales revenue earned by the seller. To the extent that credit customers take advantage of cash discounts or return merchandise for a refund, the seller's revenue is reduced. Thus, revenue shown in the income statement of a merchandising concern is often called net sales.

SALES

LESS: SALES RETURNS & ALLOWANCES

LESS: SALES DISCOUNTS

= NET SALES

Sales Returns & Allowances

Most merchandising companies allow customers to obtain a *refund* by returning any merchandise considered to be unsatisfactory. If the merchandise has only minor defects, customers sometimes agree to keep the merchandise if an *allowance* (reduction) is made in the sales price.

Remember the original sales transaction requires two parts. On August 2 Kid's Clothes sold \$2,000 of merchandise to Play Clothes, credit terms 2/10, n/30. Kid Clothes originally paid \$1,000 for the merchandise.

- 1) Accounts Receivable (Play Clothes) 2,000 Sales 2,000
- 2) Cost of the Goods Sold 1,000 Inventory 1,000

On August 5, Play Clothes returned \$500 of unsatisfactory merchandise to Kid's Clothes from the Aug. 2 sale. Kid's Clothes *cost* for this merchandise was \$250. The return decreases the Sales account. Do not credit sales; instead use a new account, Sales Return & Allowance.

Sales	500	
	(Play Clothes)	500

gives management an indication of customer satisfaction. A second entry is made to remove the cost of this merchandise from the cost of Goods Sold and restore it to the inventory records: Notice that this entry is based on the cost of the returned merchandise to the seller, not on its sales price, Sales Discounts On July 6, Kid Clothes sold \$4,000 of merchandise to Play Clothes on credit, 2/10, n/30. The merchandise originally cost Kid's Clothes \$2,000. Accounts Receivable (Play Clothes) 4,000 Sales 4,000 Cost of Goods Sold 2,000 2,000 Inventory On July 15, Kid's Clothes receives full amount due from Play Clothes from the July 6 sale.(within discount period) _____.....80 Now, assume that it wasn't until July 20 (after discount period) that Kid's Clothes received the full amount due from Play Clothes from the July 6 sale. _____.....4,000 **Delivery Expenses** If the seller incurs any costs in delivering merchandise to the customer, these costs are debited to an expense account entitled Delivery Expense. Expense 50

(Sales returns & allowances is a contra-revenue account—it is deducted from gross sales revenue to determine net sales). It is good to keep track of Sales Returns & Allowances because it

Accounting for Sales Taxes

Sales taxes are levied by many states and cities on retail sales. Sales taxes are imposed on the consumer, not on the seller. However, the seller must collect the tax, file tax returns at times specified by law, and remit to the governmental agencies the taxes collected.

	s sold \$1,000 in merchandise. e in the near future. (\$1,000 sal	Sales tax amounted to \$80 and e x 8% tax = \$80 sales tax)
(or A	ccts Receivable)	1,080

Special Journals Provide Speed & Efficiency

A special journal is an accounting record or device designed to record a specific type of routine transaction quickly and efficiently. Most businesses use separate special journals to record repetitive transactions such as sales of merchandise, cash receipts, cash payments, purchases of merchandise on account.

When a merchandising company buys merchandise to resell, the transaction is recorded in a journal. (MUST PURCHASE O ACCOUNT)	
When a merchandising company sells merchandise to its customers, the transaction is recorded in ajournal. (ON ACCOUNT)	
When a merchandising business pays its salaries expense, the transaction is recorded in ajournal. (or ANY PAYMEN	
When a merchandising business receives a payment on account from a customer, it is recorded in a journal. (\$)
When a customer is given an allowance for merchandise that was not to the customer's satisfaction, the transaction would be recorded in ajournal.

Listed below are eight typical merchandising transactions of Everyday Auto Parts, a retail auto supply store.

- a) Purchased merchandise from Acme Wholesale on account
- b) Paid an account payable to a supplier.
- c) Sold auto merchandise for cash
- d) Sold auto merchandise on account
- e) Collected an account receivable
- f) Returned merchandise to a supplier, receiving credit against the amount owed.
- g) Gave a cash refund to a customer who returned merchandise
- h) Reduced the account receivable from a credit customer who returned merchandise.

Amount the accounting records of Everyday Auto Parts are subsidiary ledgers for inventory, accounts receivable, and accounts payable. For each of the above transactions, indicate any subsidiary ledger (or ledgers) to which the transaction would be posted. Use the following codes:

Inv = Inventory subsidiary ledger

AP = Accounts payable subsidiary ledger

AR = Accounts receivable subsidiary ledger

Also indicate whether each posting causes the balance in the subsidiary ledger account to increase or decrease.

EX.

Transaction	Subsidiary ledger	Effect on Subsidiary Account Balance
A	Inv AP	Increase Increase

Office Solutions sells fax machines, copiers and other types of office equipment. On May 10, the company purchased for the first time a new plain paper fax machine manufactured by Mitsui Corporation. Transactions relating to this product during May and June were as follows.

- May 10 Purchases five P-500 fax machines on account from Mistui Corporation, at a cost of \$300 each. Payment due in 30 days.
- May 23 Sold four P-500 fax machines on account to Foster & Cole, stockbrokers; sales price \$500 per machine. Payment due in 30 days.
- May 24 Purchased an additional seven P-500 fax machines on account from Mitsui. Cost, \$300 per machine. Payment due in 30 days.
- June 9 Paid \$1,500 cash to Mitsui Corporation for the fax machines purchased on May 10.
- June 19 Sold two P-500 fax machines to Tri-State Reality for cash. Sales price, \$525 per machine.
- June 22 Collect \$2,000 from Foster & Cole in full settlement of the credit sale on May 23

Prepare journal entries to record these transactions. The company uses perpetual inventory system.

⁻ The Recording Process

Claypool Hardware is the only hardware store in a remote area of northern Minnesota. Some of Claypool's transactions during the current year are as follows:

- Nov. 5 Sold lumber on account to Bemidji Construction, \$13,390. The inventory subsidiary ledger shows the cost of the merchandise was \$9,105.
- Nov. 9 Purchased tools on account from Owatonna Tool Company, \$3,800.
- Dec. 5 Collected in cash the \$13,390 account receivable from Bemidji Construction.
- Dec. 9 Paid the \$3,800 owed to Owatonna Tool Company.
- Claypool's personnel counted the inventory on hand and determined its cost to be \$182,080. The accounting records, however, indicate inventory of \$183, 790 and a cost of goods sold of \$695,222. The physical count of the inventory was observed by the company's auditors and is considered correct.

Prepare journal entries to record these transactions. The company uses perpetual inventory system.

⁻ The Recording Process

Steve's Stereo shop sells home stereos. Some of their transactions during the month were:

- May 4 Purchased 6 Stereo's on account from Erik Electronics, at a cost of \$200 each. Payment is due in 30 days.
- May 13 Sold 2 stereos on account to K & K. Sales price \$375 per stereo. Payment is due in 30 days.
- May 18 Collected in cash the \$750 receivable from K & K.
- May 23 Paid the \$1,200 owed to Erik Electronics.
- May 31 At the end of the month Steve's Stereo shops inventory account showed a balance of \$64,500, but when a physical inventory was taking the amount of inventory totaled \$62,750.

Prepare the necessary entries for the transactions above.

⁻ The Recording Process

Net Cost and Gross Price Methods

Alex Appliance uses a perpetual inventory system. The following are three merchandising transactions:

- January 10 Purchased 10 televisions from AZ Industries on account. Invoice price, 400 per unit, for a total of \$4,000. The terms of the purchase were 2/10, n/30
- January 12 Returned 1 of the televisions and received full credit.
- January 17 Paid freight on purchase from AZ Industries for \$50.
- January 20 Paid the account payable to AZ Industries within the discount period.
 - A. Prepare the entries to record these transactions assuming Alex Appliance records purchase of merchandise at:
 - 1. Net Cost
 - 2. Gross Invoice Price
 - B. Assume Alex Appliance did not pay AZ Industries within the discount period but instead paid the full invoice price on July 10. Prepare journal entries to record this payment assuming the original liability had been recorded at:
 - 1. Net Cost
 - 2. Gross Invoice Price

⁻ The Recording Process

Net Cost and Gross Price Methods

Grace Galaxy uses a perpetual inventory system. The following are her merchandising transactions:

- January 10 Purchased 10 telescopes from Sam's Space Shop on account. Invoice price, 600 per unit. The terms of the purchase were 3/10, n/30
- January 12 Returned 3 of the telescopes and received full credit.
- January 17 Paid freight on purchase from Sam's for \$100.
- January 20 Paid the account payable to Sam's within the discount period.
 - A. Prepare the entries to record these transactions assuming Grace Galaxy records purchase of merchandise at:
 - 1. Net Cost
 - 2. Gross Invoice Price
 - B. Assume Grace Galaxy did not pay Sam's Space Shop within the discount period but instead paid the full invoice price on July 10. Prepare journal entries to record this payment assuming the original liability had been recorded at:
 - 1. Net Cost
 - 2. Gross Invoice Price

⁻ The Recording Process

Feb. 9	Sunbelt Sandals sold Specialty Shoes 100 pairs of sandals. These sandals were sold on account with terms 2/10, n/30. The cost of these sandals to
Feb. 12	Sunbelt Sandals was \$30 per pair, and the sales price was \$70 per pair. FedEx charged \$70 for delivering this merchandise to Specialty Shoes. These charges were split evenly between the buyer and the seller, and were paid immediately in cash.
Feb. 13	Specialty Shoes returned 5 pairs of sandals because they were the wrong size. Sunbelt allowed Specialty Shoes full credit for this return.
Feb. 19	Specialty Shoes paid the remaining balance to Sunbelt Sandals within the discount period.

Both companies use a perpetual inventory system.

Instructions

- a. Record this series transactions in the general journal of Specialty Shoes. (The company records purchases of merchandise at *net cost*)
- **b.** Record this series transactions in the general journal of Specialty Shoes. (This time use the Gross method)
- c. Record this series of transactions in the general journal of Sunbelt Sandals. (The company records sales at gross sales price.)

Problem 6.5A Merchandising Transactions

The following is a series of related transactions between Leggy Pants and Viking, a chain of retail clothing stores:

- Sept. 11 Leggy Pants sold Viking 200 pairs of pants on account, terms 1/10, n/30. The cost of these pants to Leggy Pants was \$30 per pair, and the sales price was \$70 per pair.
- Sept. 14 United Express charged \$60 for delivering this merchandise to Viking. These charges were split evenly between the buyer and the seller, and were paid immediately in cash.
- Sept. 15 Viking returned 5 pairs of pants to Leggy Pants because they were the wrong size. Leggy Pants allowed Viking full credit for this return.
- Sept. 21 Viking paid the remaining balance due to Leggy Pants within the discount period.

Both companies use a perpetual inventory system.

Instructions

- a. Record this series of transactions in the general journal of Leggy Pants. (The company records sales at gross sales price.)
- **b.** Record this series transactions in the general journal of Viking. (The company records purchases of merchandise at *net cost* and uses a Transportation-in account to record transportation charges on inbound shipments.)
- c. Viking does not always have enough cash on hand to pay for purchases within the discount period. However, it has a line of credit with its bank, which enables Viking to easily borrow money for short periods of time at an annual interest rate of 11%. (The bank charges interest only for the number of days until Viking repays the loan.) As a matter of general policy, should Viking take advantage of 1/10, n/30 cash discounts even if it must borrow the money to do so at an annual rate of 12%? Explain fully and illustrate any supporting computations.

⁻ The Recording Process

Merchandising transactions

The following is a series of related transactions between Taylor TV's, a TV wholesaler, and Nick's Knack's, a chain of retail electronic stores.

- February 9 Taylor TV's sold Nick's Knack's 50 TV's on account, terms 2/10, n/30. The cost of these TV's to Taylor TV's was \$80, and the sales price was \$200 per pair.
- February 12 Nick's Knack's returned 10 TV's to Taylor TV's because they were the wrong size. Taylor TV's allowed Nick's Knack's full credit for this return.
- February 14 United Shipping charged \$150 for delivering the merchandise to Nick's Knack's. These charges were split evenly between the buyer and seller, and were paid immediately in cash.
- February 19 Nick's Knack's paid the remaining balance due to Taylor TV's within the discount period.
 - A. Record this series of transaction in the general Journal for Nick's Knack's. (The company records purchases of merchandise at *net cost*)
 - B. Assume Nick's Knack's did not pay Taylor TV's within the discount period but instead paid the full invoice price on March 1. Prepare journal entries to record this payment
 - C. Record this series of transaction in the general Journal for Nick's Knack's. (The company records purchases of merchandise at *Gross Method*)
 - D. Assume Nick's Knack's did not pay Taylor TV's within the discount period but instead paid the full invoice price on March 1. Prepare journal entries to record this payment
 - E. Record this series of transactions in the general journal for Taylor TV's. (The company records sales at gross sales price.)
 - F. Assume Nick's Knack's did not pay Taylor TV's within the discount period but instead paid the full invoice price on March 1. Prepare journal entries to record this payment
