

Cardboard Neighborhood
Collect toilet paper and paper towel tubes for a few days to a week. You might need duct tape or masking tape for this activity. Make a cardboard neighborhood by reviewing the elements of art!

Make paper cones (form) with copy paper and attach them to the cardboard tubes. Paint or color the tubes, one for each color of the rainbow. Shapes for doors and windows. Draw lines to create window details and patterns on the roof of each building. Now... PLAY! Grab some figurines and pretend.

Create a drawing on a board [cardboard is perfect] glue, tape or just place materials on your image to create colors, textures and /or patterns. Take a picture of your masterpiece before you recycle it.

RECYCLE

Printed Flowers
from recycled materials
Stamp a flower using items from your recycling bin (Toilet tubes, bottle caps, cups...). Dip in paint to create the outline of each part of your flower. Color the rest of the flower with art materials you have at home, paints, markers, crayons.

Create a mask with recycled materials and objects around your house. You can use a piece of cardboard or a milk/juice/soda container and glue on objects. Cut up cardboard/paper pieces to create features. Once all objects are glued on you can paint or color with anything you have.

Plastic Bag Art
Cut shapes and strips (lines) from the plastic bag(s). Draw or paint on the plastic bag(s). Create texture by crumbling the plastic bag(s). Put everything you create from the plastic bag(s) to make a piece of art work. Glue it down on a piece of paper or cardboard or a plastic bag.

Recycled Tissue Box Monster
Transform an empty tissue box to create a silly monster. Use the tissue box opening to create a mouth that can be used to "eat" things, and attach other found objects to construct monster features (scales, horns, legs, etc.). Add a pop of color with paint or any drawing materials you may have!

Create a book using recycled items such as plastic bags, paper, cardboard. Then add (draw, paint, glue) pictures and maybe words to the pages of the book.

Try some of the fun online activities on the PCSD resource web page!
